Index

A

Abstract concepts, 38
Accountability, in education, 198
Action techniques, 145
Adaptive, 5
Adaptive systems, and technology education, 4-5
Adult learning, using principles of, 137-138
Affective domain, 25, 28-29, 203
Affective learning, 25
Algorithms, 91
American Council on Education, 10
American Industry Project, 112-113
American Society of Training and Development, 9, 10
Analysis, as level of learning, 28
Ancilliary content for lectures, 83-84
Andragogical model, 137
Application, as level of learning, 27-28
Association for Educational Communication and Technology, 138, 184
ASSURE Model, 127-131, 135
  analyze learner characteristics, 128
  evaluate, 130-131
  require learner response, 129-130
  select, modify, or design materials, 129
  state objectives, 128-129
  utilize materials, 129
Automatism, 76
Autonomy, 76

B

Basic skills, 11-12
Brainstorming, 147
Break-even charting, 52-54
Business/industry response, to information age, 9-10
Buzz sessions, 147

C

CAD/CAM (Computer Aided Design/Computer Assisted Manufacturing), 190
Capacity management, 49
Carnegie Forum's Task Force on Teaching as a Profession, 10
Chrysler Corporation, 119
Classroom content/methods, in the interpretation of industry approach, 118-119
Closed questions, 146
Cognitive domain, 25, 26-28, 203
  learning levels in, 26-28
Cognitive skills, 12, 25
Commission on Pre-College Education in Mathematics, Science and Technology, 87
Committees, 149
Communication
  concept of, 45-47
  interdisciplinary curriculum for teaching, 68-69
  and manufacturing, 105-106
  relevance of, 101
Competition, 44

Comprehension, as level of learning, 26
Computer aided process planning (CAPP), 49
Concept, definition of, 37-40
Conceptual learning approach, 20, 37
  concept examples in technology education, 45-54
  concepts of universal application, 42-45
  defining concepts, 37-40
  value of conceptual understandings, 40-42
Conceptual understandings, value of, 40-42
Construction
  and manufacturing, 106-107
  relevance of, 101
Convergent thinking, 90, 91
Cooperative group interaction techniques, 143-163, 205
  action techniques, 145
  brainstorming, 147
  buzz sessions, 147
  committees, 149-150
  debates, 150
  discussions, 146
  gaming, 149
  implementing, 154-163
  interaction techniques, 145, 146-150
  interviewing, 148
  presentations, 145
  questioning, 146
  reasons for using, 151-154
  role-playing, 148-149
  seminar, 147-148
  student-directed, 151
  teacher-directed, 151
Critical thinking skills, 152
Culture, and technology, 74-76
Curricular design, in technology education, 14
Curriculum, nature of, and use of interdisciplinary approach, 59
Curriculum development, in the interpretation of industry approach, 111-112

D

Damon Corporation, 119
Debates, 150
Delivery systems
  cooperative group interaction techniques, 143-163, 205-206
  defining, for teaching technology education, 19-20
  definition of, 124
  discovery, inquiry and experimentation, 166-181, 206
  formal presentations and demonstrations, 125-142
  games and simulation, 183-198, 206
  lectures and demonstrations, 205
Disciplines, 57
Discovery, inquiry and experimentation, 22-23, 166-181, 206
  application of inquiry training in classroom, 172-178
  inquiry training model, 167-172
  sample inquiry training lessons, 178-181

Discussions, 146
Divergent questions, 146

E

Education
  accountability in, 198
  impact of technology on, 78-79
Efficiency tools, 45
Elementary school, role of technology education in, 60
End goal, 206
Energy, 100
Evaluation, as level of learning, 28
Evaluative questions, 146
Evaluator, technology teacher as, 94

F

Facilitator, technology teacher as, 94
Family, impact of technology on, 77-78
Feedback, 47
Field trips, selecting, 84
Finance, 51-52
Formal presentations/ demonstrations, 22, 125-142
  ASSURE Model, 127-131, 135
  considering the components, 133-134
  controlling learning environment, 132-133
  definitions of, 131
  guidelines for preparing, 138-140
  and learning readiness, 133
  potential in, 134-142
  purposes of, 131-132
  technological support for, 136-137
  utilizing principles of adult learning, 137-139
Freedom, 43-44

G

Games, 23, 120, 149, 183-198, 206
  current applications of, 190-191
  definition of, 185
  development of, 193-197
  differences between simulation and, 186
  potential of, 184
  purposes of, 188-190
  rationale for, 186-188
  in teaching technology education, 23, 191-192
General Motors Corporation, 10
Government, 44
  impact of technology on, 78
Group interaction, to teaching technology education, 22

H

Heuristics, 90-91
Higher level learning, 152
High school, role of technology in, 60-61
High technology, development of, as essential to information age, 8-9
Human development, and technology education, 4
Human factors, as basis for relationship between technology and culture, 74-75

I

Illinois Plan for Industrial Education, 117
Ill-structured problems, 97
Inpact films and media, 82-83
Industrial applications, 104
  in the technological systems model, 104
Industrial arts, differences between technology education and, 3
Industrial Arts Curriculum Project (IACP), 113-116, 192
Industrial arts education, 14
Industrial Education, 63
Industrial technology, 111
Industry
  definition of, 111
  impact of technology on, 79
Industry and Technology Education, 116-117
Influence, 32
Information society, 7-10
IMPUT/PROCESS/OUTPUT model, 95-96
Inquiry method, 206
Inquiry training, 166, 167
  application of inquiry training in classroom, 172-178
  implementation of, 170-172
  process of, 169-170
  purpose and goals of, 168
  sample lessons, 178-181
Inquiry training model, 167-168
In-service education, 207
Instructional design, 126-127
Instructional strategies
  definition of, 17
  factors in selecting, 18-19
  need for new, 17-19
  reasons for need of new, 18
Integrating the systems of technology approach, 21, 99-100
  manufacturing and communication, 105-106
  manufacturing and construction, 106-107
  manufacturing and transportation, 106
  natural, 107
  "systems approach" in technology, 102-103
  systems of technology, 100-101
  technological systems model, 103-105
Interaction techniques, 145
  kinds of, 146-150
Interdisciplinary approach, 20-21, 56, 204
  advantages of using, 61-62
  definition of, 56-59
  examples of planning interdisciplinary curriculum, 67-70
  identifying interdisciplinary content, 62-63
  implementing, 62-67
  planning curriculum for, 63-65
  reasons for using, 59-62
  teaching interdisciplinary content, 65-67
Interdisciplinary content, identifying, 62-63
Interdisciplinary curriculum, planning, 63-64
Interference, 46
Interpretation of industry approach, 21, 110-111, 205

classroom content and methods for, 118-119
curriculum development based on, 112-117
defining terms in, 111-112
laboratory activities and methods, 119-120
special techniques in, 120
Interviewing, 148

J

Justice, 42-43
Just in time (JIT), 49

K

Knowledge, as level of learning, 26

L

Laboratory activities and methods, in the interpretation of industry approach, 119-120
Learning domains, 203
Learning environment, controlling, 132-133
Learning readiness, 133
Learning theory, 25
and learning domains, 25
Lectures and demonstrations, 205
Life-long learning, 12

M

Manufacturing
and communication, 105-106
and construction, 106-107
relevance of, 101
and transportation, 106
Maryland Plan, 170-171
Master plan, 17
Master planning, 49
Materials requirements planning (MRP), 49
Mechanical cutting, concept of, 47-49
Message design, 127
Middle school, role of technology education in, 60
Minnesota Plan for Industrial Technology, 117
Money, 42
Monism, 76
Motivation, and student needs, 30-33

O

OM (Olympics of the Mind), 96
"Orchestrated Systems" program, 58-59
Order-size-cost relationship, 49, 50

P

Pedagogy, 137
Personal decision making, 81-82
Preparation, importance of, for presentations and demonstrations, 131-134
Presentations, 145
Preservice education, 207
"Principles of Technology" program, 58
Private property, 44
Probing questions, 146
Problems
defining, 88-89

ill-structured, 97
semi-structured, 96-97
Problem solving, definition of, 89-91
Problem-solving approach, 21, 87-88, 204-205
changes in problem solving, 91-93
characteristics of good problems, 95-96
defining the problem, 88-89
definition of problem-solving, 89-91
ill-structured problems, 97
role of teacher, 93-95
semi-structured problems, 96-97
Process engineering, 47
Procurement, 49-51
Production, interdisciplinary curriculum for teaching, 69-70
Production activity control, 49
Project method, 166
Psychomotor domain, 25, 29, 203
Psychomotor skills, 12, 25

Q

Question/answer game, 149
Questioning, 146

R

Religion, impact of technology on, 78
Resources, 45
Richmond Plan, 58
Role playing, 120, 148-149

S

School Shop, 63
Self-augmentation, 76
Seminar, 147-148
Semi-structured problems, 96-97
Simulation, 23, 149, 191-192. *See also* Games and simulation definition of, 185
development of simulation, 193-197
current applications of, 190-191
difference between games and, 186
potential of, 184
purposes of, 188-190
rationale for, 186-188
types of, 193
Situation room, 191
Social/cultural approach, 21, 72-74, 204
methods of teaching social/cultural impacts, 82-85
purpose of teaching social/cultural impacts, 79-82
technology and culture, 74-76
technology and social systems, 76-79
Social/cultural impacts
methods of teaching, 82-85
purpose of teaching, 79-82
Social systems, and technology, 76-79
"Societal Problem Approach," 171-172
Society, future needs of, 6-7
Special projects/reports, 85

Stanford Institute for Research on Educational Finance and Governance, 13
Student-directed interaction experiences, 151
Student impact activities, 84
Student needs, 30, 204
  motivation and, 30-33
  types of, 30, 32
  and values, 32-33
Student values, and needs, 32-33
Subject matter, 57-58
Sustenance, 32
Synthesis, as level of learning, 28
Systems, 5
"Systems approach" in technology, 102-103
Systems Component/Gaming Element Matrix, 195, 196

T

Teacher-directed interaction experiences, 151
Teaching/learning (T/L) environment, 143
Technical processes, in the technological systems model, 104
Technological civilization, 6
Technological factors, as basis for relationship between technology and culture, 75-76
Technological impacts, in the technological systems model, 104-105
Technological literacy, 107-108, 171
  definition of, 6
  increasing, 107-108
  survival skills as basis of, 12
Technological literacy scale, 72-73
Technological support, 136-137
Technological systems, 205
Technological systems model, 103-105
Technologist, responsibilities of, 81
Technology
  and culture, 74-76
  definition of, 6, 111, 185
  effect of, on education, 78-79
  effect of, on family, 77-78
  effect of, on government, 78
  effect of, on industry, 79
  effect of, on religion, 78
  and social systems, 76-79
  "systems approach" in, 102-103
  systems of, 100-101
Technology bookshelf, 83
Technology education, 111-112
  acceptance of, in school curriculum, 203
  for change and the future, 10-14
  concept examples in, 45-54
  conceptual learning approach to teaching, 20, 37-54
  content, 101
  curricular design in, 14
  definition of, 4-6
  delivery systems for teaching, 19-20, 22-23, 205-206
  differences between industrial arts and, 3
  discovery, inquiry, and experimentation for, 22-23, 166-181, 206

formal presentations and demonstrations for, 22, 125-142
and future needs of society, 6-7
future of, 207
games and simulation for, 23, 120, 149, 183-198, 206
and implementing instructional strategies for, 3
and the information society, 7-10
instructional strategies for, 17-19, 203
integrating the systems of technology approach to, 21, 99-107
interdisciplinary approach to teaching, 20-21, 56-70, 204
interpretation of industry approach to teaching, 21, 110-111, 205
problem solving, 21, 87-97, 204-205
problem solving approach to teaching, 21
relationship between teaching and delivery approaches, 23-24
role of, in elementary school, 60
role of, in high school, 60-61
role of, in middle school, 60
social/cultural approach to teaching, 21, 72-85, 204
technological systems, 205
Technology resource center, 82
Technology teacher
role of, in problem solving, 93-94
selecting the appropriate, 67
Technology Teacher, The, 63
